

THE ADVANTAGES OF USING THE EASYPITCH
INTERACTIVE SCREEN TO TEACH I.T.

“

It’s more appealing to both the teacher and the children [...] they’re hands-on with it and get really involved [...] Seeing how the kids use the screen, I can’t help thinking to myself that I, an adult, will never be able to use it as well as they do. It’s true when they say it’s extremely easy to use!

WLADEK SOWINSKY
President of the La Rochette Computer Club

”

Down with the projector! Long live the Easypitch interactive screen!

With a passion for all things I.T., digital, and technology, the La Rochette Computer Club has acquired itself a large Easypitch interactive screen to deliver the best possible learning experience to its learners. Being a static tool, a projector doesn’t encourage learners to engage with their lessons. The Computer Club’s president would like to introduce more participative courses, in line with the subjects taught, namely I.T., coding and everything related to multimedia. The need became clear for a high-tech tool with a UHD display that offers the possibility to interact, ushering modernity and efficiency into the classrooms.

Once again, Easypitch delights its users in terms of technical performance and ease of handling. Feedback from the association, coaches and members on their experience of using the interactive display, through the president of La Rochette Computer Club, Mr. Wladek SOWINSKY.

“

That’s progress for you! I believe integrating these new technologies—which I personally find amazing—is a must. I attended a session with pupils from Year 6; it’s a game-changer, they’re delighted with it!

”

These are the words of the mayor of La Rochette, Mr. Pierre YVROUD, who supported the Computer Club in this project to integrate new digital technology into their students’ lessons. The latter enthusiastically expressed his satisfaction at the project’s outcome during his visit to the class where the Easypitch 86” touchscreen has been installed, for its unveiling.

NEEDS

- Have an ultra high definition dynamic display
- Have highly efficient features, including the ability to write and erase without chalk
- Draw explanatory diagrams
- Facilitate learning
- Catch learners’ attention

“

Before equipping ourselves with an Easypitch interactive screen, we relied on the classic projector set-up but wanted to replace this with a screen, for several reasons. The first of these is that it’s a UHD display, meaning Ultra-High Definition, so for those members who want to be able to visualise what the coach is talking about on the board, it’s much easier, this resolution is much better

”

This desire to bring a digital, modern touch to teaching techniques is of particular interest to all. Teachers have a tool that makes their lessons more dynamic. As for the students, the screen boosts their participation and engagement during lessons. The association has noticed how the students' appetite to learn I.T. skills has been piqued by this giant touchscreen: **«they're dealing with more than just computers—now, they're handling information and computing at the same time»** explains Mr. SOWINSKY

“
Seeing how the kids use the screen, I can't help thinking to myself that I, an adult, will never be able to use it as well as they do. It's true when they say it's extremely easy to use!
”

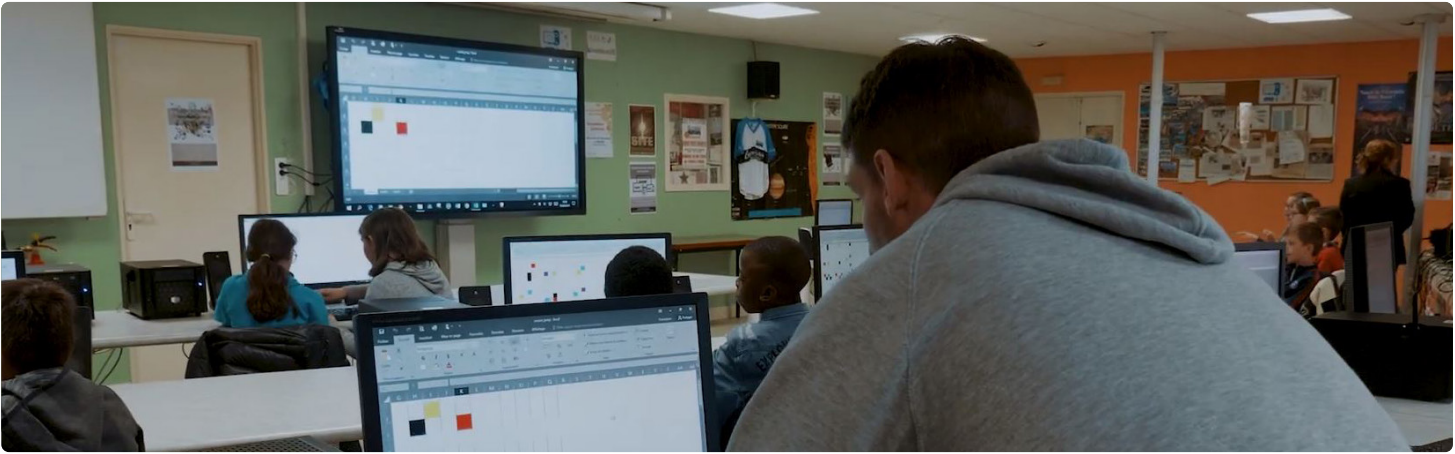

Highly intuitive, there was no need to train up the teachers to use the Easypitch screen. Naturally, the kids operate the screen too, becoming participants in this interactive solution. They're handling not only the computers but the information too.

BENEFITS

- Easy-to-use screen
- More appealing display
- Learning is more fun and enjoyable
- Ability to draw pictograms using the in-built screen software
- Optimised work time
- Ability to erase with a simple swipe of the hand

ADVANTAGES OF THE EASYPITCH SCREEN

- Touchscreen with 32 points of contact, fostering teamwork
- Large interactive UHD display delivers better visibility for the whole class
- Intuitive interactive software is included to annotate, edit and save files
- Integrated Wi-Fi access point to connect multiple wireless devices

“
My decision to choose an Easypitch screen was based on the technical features it offers, together with the display's quality. It was simply the one that best addressed our needs.
”

The staff, teachers and students of the Computer Club have been won over—the quality of the interactive screen is enough to persuade anyone. Its features, accessibility, and performance fully meet the needs of all users, delivering a great user experience.

ABOUT THE LA ROCHETTE CLUB

Established in 1985, the La Rochette Computer Club, located in Seine-et-Marne, has for over 30 years been providing beginners courses in computing as well as lessons to enhance the skills of children and adults. The La Rochette computer club's aim is to introduce members to the use of technology and the world of I.T., and in later years, to the era of Internet. The club emphasises that there is no age limit to learning, and all age groups are welcome—motivated children, teenagers, adults and senior citizens alike.
